**ANSWER
KEY**

**Estimating -
Counting Large Collections**

1. Find the total number of gold coins in each collection.

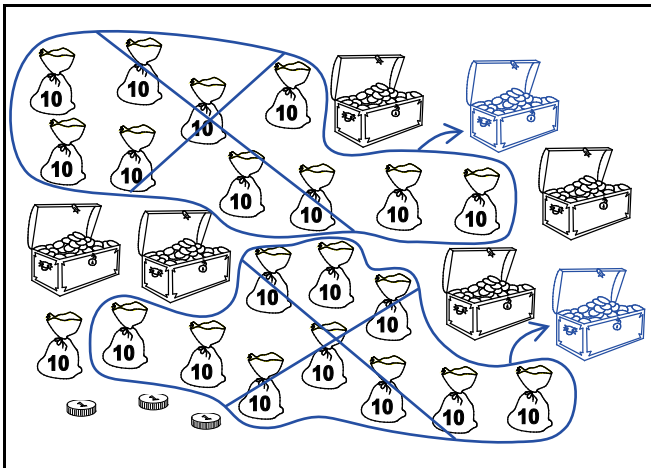

a)

	7	:	700
	3	:	30
	4	:	4

There are **734** gold coins in this collection.

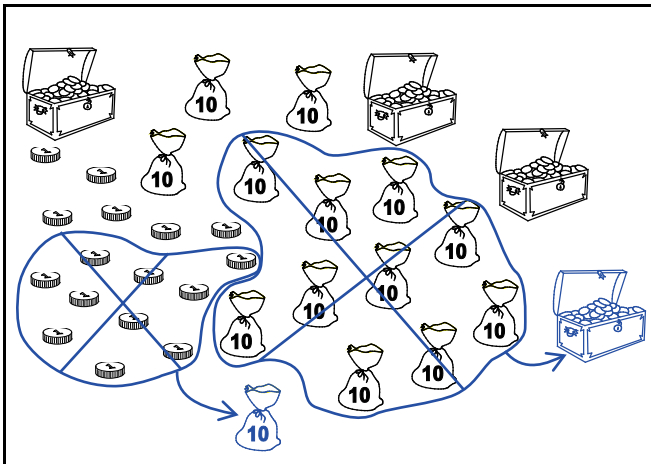

b)

	7	:	700
	1	:	10
	3	:	3

There are **713** gold coins in this collection.

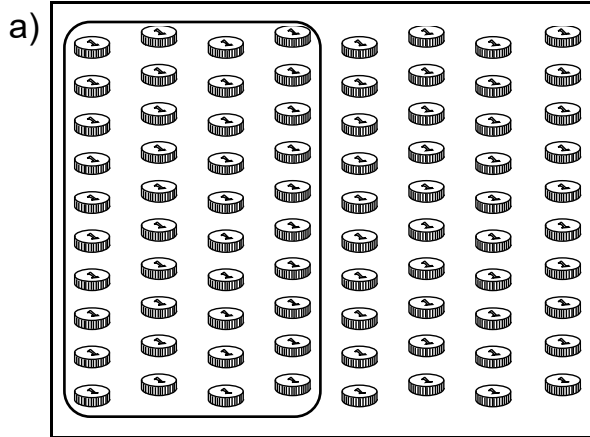

c)

	4	:	400
	4	:	40
	6	:	6

There are **446** gold coins in this collection.

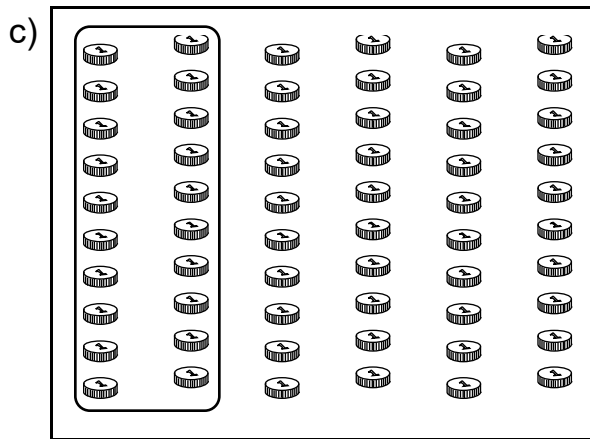

2. Use the sample to **find** approximately how many gold coins there are in each collection.

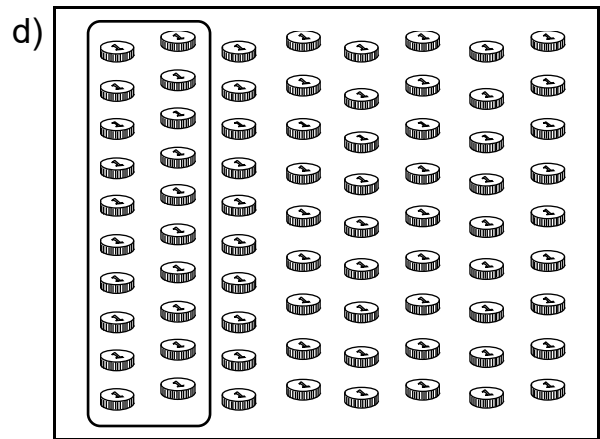

There are approximately 80 gold coins in this collection.

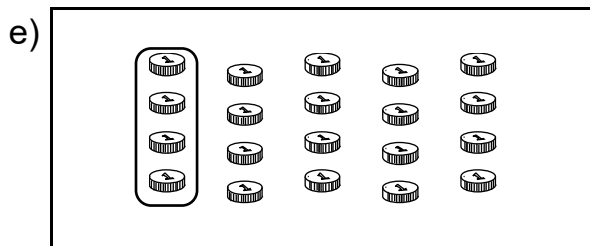

There are approximately 100 gold coins in this collection.

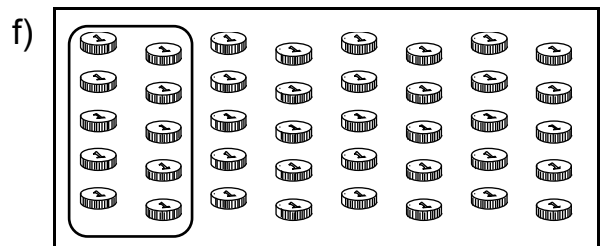

There are approximately 60 gold coins in this collection.

There are approximately 80 gold coins in this collection.

There are approximately 20 gold coins in this collection.

There are approximately 40 gold coins in this collection.
