Section 19

Reinforcement
Division with a Remainder

ANSWER KEY

1. Find the quotients. **Represent** the divisions to help you.
Write the remainder in the form of a fraction.

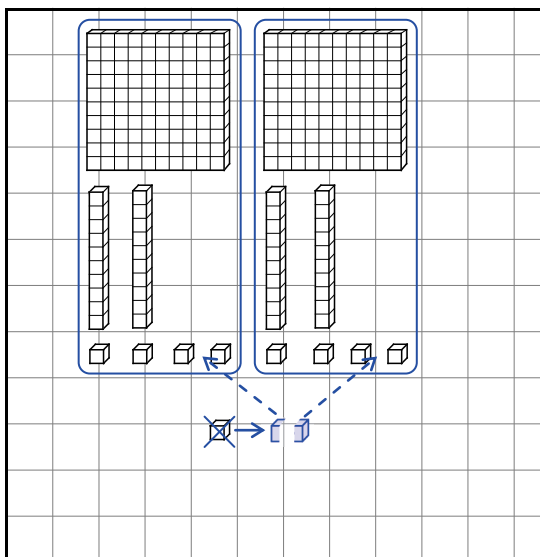

a) $233 \div 2 = 116 \frac{1}{2}$

b) $225 \div 2 = 112 \frac{1}{2}$

c) $249 \div 2 = 124 \frac{1}{2}$

d) $273 \div 2 = 136 \frac{1}{2}$

2. Represent each division. **Find** the quotient. **Write** the remainder in the form of a fraction.

a) $63 \div 2 = 31 \frac{1}{2}$

b) $25 \div 2 = 12 \frac{1}{2}$

c) $47 \div 2 = 23 \frac{1}{2}$

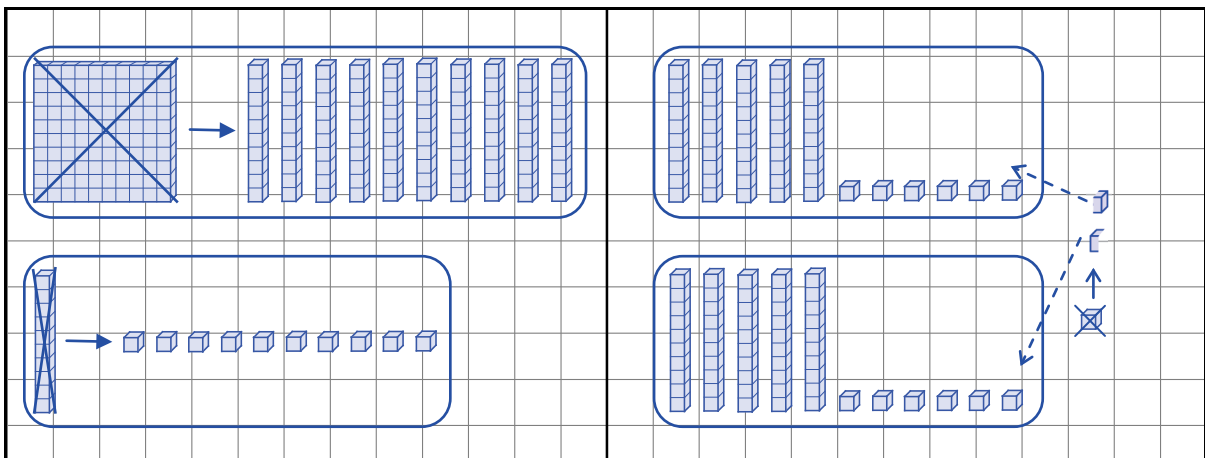

3. Two frogs ate a total of 83 flies. If the two frogs ate the same number of flies, how many flies did each frog eat?

Each frog ate $41 \frac{1}{2}$ flies.

4. Lola and Eva shared 113 nuts equally. How many nuts did each girl get?

Lola and Eva each got $56 \frac{1}{2}$ nuts.
